

Henschel Reels

high tech fly reels

Dual Mode

The special „Foot Forward“ shifts the center of gravity of the reel mounted onto the rod. This shift of the center of gravity results in a better balanced rod/reel system.

Dual Mode The Traditional Designed Combination reel in which the spool contains the mechanics of the reel and the arbor in normal sized.

You change the spool by removing the screw from the reel **ON THE SIDE OPPOSITE THE REEL HANDLE**. Then you can remove the spool from the frame or housing.

size	diameter inch/mm	Spool width inch/mm	Line Class	Backing yds/m	weight ounces/grams
# 2	3.38/86	1.00/25,4	7-9	196/170	9.40/266
# 3	3.81/97	1.10/27,5	10-11	275/250	12.37/350
# 4	4.09/104	1.22/31,0	12-14	306/279	15.40/536
# 5	4.72/120	1.22/31,0	16-20	500/455	15.90/450

You can order any reel with a regular foot as well as a forward foot.

Dual Mode-reels are also deliverable in **TITANIUM** (spool, housing, reelfoot, drag adjustment knob)
