

## *Anti Reverse* *Black & Silver*

An **Anti Reverse reel** has a mechanism between the retrieving handle and the spool. This allows a fish to pull line off of the reel whenever a fish pulls the line with a force greater than the drag setting.

As line is pulled off the reel, the retrieving handle does not spin with the spool.

**Advantage:** Whenever a fish pulls the line with a force greater than the drag setting, he will pull line off of the reel protecting from break-offs. When you are fishing for large fish, a spinning handle on the reel can be dangerous to the fisherman.

**Disadvantage:** You can not override the drag setting when landing a fish.

Größe	Durchmesser inch/mm	Breite inch/mm	Schnurklasse	Backing yds/m	Gewicht ounce/Gramm
# 0	2.64/ 67	1.18/30	1-4	80/73	3.180 / 90g
# 1	3.07/ 78	1.26/32	5-6	109/99	5.654 / 160g
# 2	3,38/ 86	1.33/34	7-8	196/179	7.773 / 220g
# 3	3.81/ 97	1.50/38	9-10	273/250	10.247 / 290g
# 4	4.09/104	1.65/42	11-12	414/380	12.720 / 360g
# 5	4.50/120	1.77/45	13-20	620/566	15.900 / 450g

You can get our reels also in a custom made style:

- 24 carat gold plated spool/visible steel parts
- in color anodising.

You have the possibility to choose between **two different reel feet**. The special „foot forward“ shifts the center of gravity of the reel mounted onto the rod. This shift of the center of gravity results in a better balanced rod / reel system.
