Direct Drive

Black & Silver

Direct Drive- reel: The retrieving handle is directly attached to the spool. Once you have a fish on the reel, you have to let go of the handle for the fish to pull line off of the reel.

The handle spins around as the fish takes line. Once you are retrieving the fish, you can put as much pressure on the fish as you apply to the handle to land the fish. The ability to apply pressure to the fish with the reel, overriding the drag system, is the **Advantage** of a Direct Drive reel.

The Disadvantage of a Direct Drive reel is that whenever you are holding the handle the drag system will not operate and can cause the fish to break off.

Größe	Durchmesser inch/mm	Breite inch/mm	Schnurklasse	Backing yds/m	Gewicht ounce/Gramm
# 0	2.64/ 67	1.18/30	1-4	80/73	3.180 / 90g
# 1	3.07/ 78	1.26/32	5-6	109/99	5.654 / 160g
# 2	3,38/ 86	1.33/34	7-8	196/179	7.773 / 220g
# 3	3.81/ 97	1.50/38	9-10	273/250	10.247 / 290g
# 4	4.09/104	1.65/42	11-12	414/380	12.720 / 360g
# 5	4.50/120	1.77/ 45	13-20	620/566	15.900 / 450g

You have the possibility to choose between **two different reel feet**. The special „foot forward“ shifts the center of gravity of the reel mounted onto the rod. This shift of the center of gravity results in a better balanced rod / reel system.

The only reel design on the market, which can use either a Direct Drive-spool or an Anti Reverse-spool in the housing.
